EXPERIENCE

CallHub, Bengaluru — Senior Software Engineer

March 2021 - Current

- Created & owned modules for core components of Callhub.
- Responsibilities included Engineering Support & Bug Fixes during the initial years. Later owned the reliability and R&D aspects of Callhub.
- Endured fast-paced shipping of products keeping scalable, plug-play and least redundant architecture.
- Inculcated a culture of leadership, teamwork, entrepreneurship, learning & innovation into the team.
- Innovative projects during the job included 2FA Authentication and server-rendering of notifications, integrating third-party APIs via dual push-pull setup; setting DB-based Celery Backend for utilizing chains and chords.
- Other notable projects included Compression for AV files using FFMPEG/PIL with dynamic settings, Transcription/NLP modules via open source models, Automated voice response service, Switch / Multiple Login Feature for CRM and POCs on RCS, AI-based Queue Cards.
